Date of Last Revision: 12/11/97

Preparing students for careers is one goal of the education program. Career education will be infused into the education program for grades kindergarten through eight. This education shall include, but not be limited to, awareness of self in relation to others and the needs of society, exploration of employment opportunities, experiences in personal decision-making, and experiences of integrating work values and work skills into their lives.

It shall be the responsibility of the principal to assist certified personnel in finding ways to integrate career education throughout the curriculum. The board shall review the means by which career education is integrated with other instructional programs.
